

Silicon Valley AUTOSAR Users Group

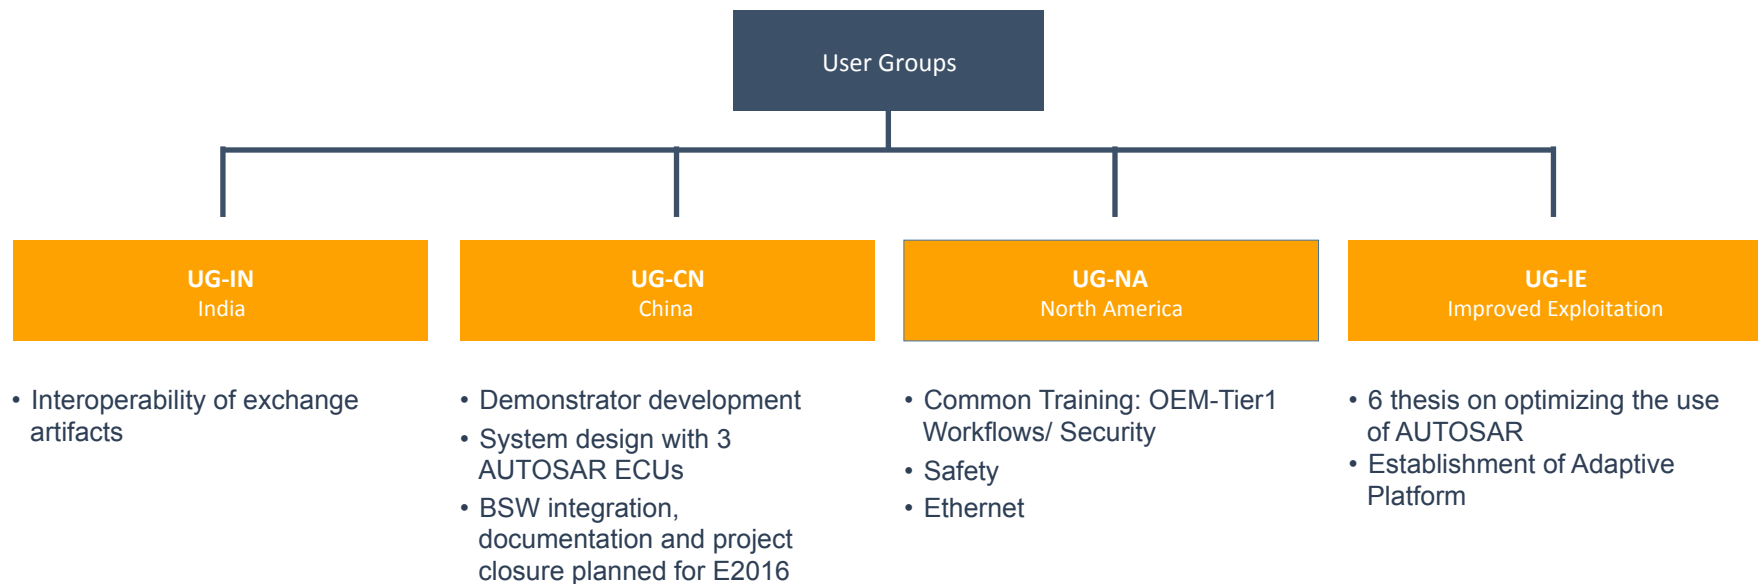

Talking Points

April 3, 2018

Organizational Issues

- User Group's position within the AUTOSAR Alliance
- User Group as Liaison
- Meeting Frequency and Activities
- FT-SV

User Group Structure

How do we want to fit in?

- Formal existence brings restrictions (membership, work products)
- Informal structure lets us work beyond the boundaries of the Alliance's goals

User Group as Liaison

- UG Organizers are active members of the North American User Group, and of Feature Teams
- We have a coach on the Project Leadership team
- So there is a direct route from this group to those inside the Alliance.

Frequency

- Suggestion is to hold the Meetup monthly.
 - Dates may vary due to my travel schedule
- Venue
 - Here at SVL if we think a cap of 50 people is reasonable
 - Alternative locations otherwise

Activities

- Possible speakers
 - Vendors
 - Those preparing a paper for another conference
 - ARTOP, SOME/IP, COMASSO
 - UG Members (PLEASE!)
- Activities
 - Standardization beyond the standard.
 - Joint Efforts
 - ??

Work Package

Feature Team

Feature Team Silicon Valley

- Looking for a group of people prepared to form a Silicon Valley based Feature Team.
- Employers need to be prepared to allot at least 2 days per week of your time to the effort.
- Opportunity to influence development of the standard and the APD.
- Formation TBD, Goals TBD.
